

ProManage Insight Master

IDENTIFY WHAT MATTERS. IMPROVE FASTER.

ProManage Agentic Operations Intelligence Platform for Manufacturers

Most manufacturers do not have a data problem. They have a prioritization problem.

Manufacturers already have MES, dashboards, reports, ERP systems and analytics tools. The challenge is knowing which issues matter most and where to focus engineering efforts next.

ProManage helps teams identify, prioritize, and act on the highest-impact improvement opportunities.

Capture expert improvement methods once. Reuse them across teams, plants, and future initiatives.

dada

ELECTRICAL HOME APPLIANCES

Scrap root-cause analysis previously required 3-4 hours.

With Insight Master, teams prepare, review and discuss results during the meeting itself.

 **50%**
Faster
Problem
Analysis

Result: 50% reduction in analysis time and at least one hour of engineering capacity freed every day.

dada

ELECTRICAL HOME APPLIANCES

Insight Master identified a robot-related cycle time issue that had gone unnoticed.

After corrective action, cycle time improved from 42 seconds to 39 seconds.

 **20%**
More
Production
Per Shift

Result: Up to 20% more production per shift

UNIGEN

Insight Master identified unusually long setup times associated with a specific operator.

Investigation revealed that a newly assigned operator was causing the issue.

 **Faster
Root-Cause
Discovery**

Result: Rapid identification of an operator-related performance issue that would otherwise require manual investigation.

AI-POWERED IMPROVEMENT DISCOVERY

From Data to Actionable Recommendations

Insight Master transforms operational data into repeatable improvement workflows.

It helps manufacturers identify hidden losses, uncover root causes, prioritize actions and scale continuous improvement across teams and plants.

HOW INSIGHT MASTER WORKS

1 Choose the Operational Question

Which loss, KPI, machine, line, shift, product, or process should be investigated?

2 Build Reusable Analysis Workflows

Capture expert methods as repeatable analysis workflows.

3 Schedule Recurring Analysis

Run end-of-shift, daily, weekly, or monthly reviews automatically.

4 Produce Insights

Discover what is driving your losses and improvement opportunities.

5 Take Action

Prioritize Kaizen projects, corrective actions and performance improvement opportunities.

Capture expertise once. Reuse it everywhere.

Insight Master transforms expert analysis methods into repeatable workflows that can be shared, reused, and scaled across the organization.

TRUSTED BY LEADING MANUFACTURERS WORLDWIDE

SEE WHAT MATTERS NEXT.

Discover how Insight Master helps manufacturers identify what matters, prioritize actions and improve faster.
